Experience

Senior Software Developer

Insurity Data Analytics Solutions
Remote | September 2019 - Present

- Serving as the lead client developer for our Event Response app
- Responsible for the architectural direction of the client codebase
- Planning and developing major core features across all apps
- Working across teams to negotiate design & implementation
- Working to improve test coverage across our core
- Optimizing and documenting our process
- Training new developers on our codebase, product, and process

Lead UI Designer / UI Developer

Carl Zeiss Meditec Digital Innovations
Temple, Texas | October 2016 - May 2019

- Began as a startup where I was one of four starting developers
- Was responsible for our application's UI and its development
- Built and maintained our frontend architecture and build system
- Built and maintained our core React component library
- Worked with the product team to refine our user workflows
- Developed wireframes and mockups for upcoming features
- Guided developers as they implemented and maintained those designs

UI Developer

Integrity Digital Solutions LLC
Temple, Texas | May 2015 - October 2016

- Acted as an adviser on UI and UX issues
- Helped train new developers on modern JavaScript and CSS
- Took the existing product and developed a design system
- Researched React, Redux, and other tools for an upcoming surgical product
- Helped build out the foundation for what would eventually become Veracity Surgical

Consultant

CGI Group Commercial
Belton, Texas | January 2013 - May 2015

- Helped design and develop internal applications for the City of San Diego
- Created mockups and graphics for new applications
- Acted as the lead frontend developer on several projects
- Worked to find creative ways to apply modern practices to legacy software
- Advised on UI and UX issues when needed
